

# Event registration certification

Report issued by Safe Creative as service provider and trusted third party. An attestation of the integrity of a sequence of declarations —not an event-by-event listing—; the complete list accompanies this report in the evidence archive (section 5).

**SAMPLE DOCUMENT** · Fictitious data. This is not a certification issued by Safe Creative, it is not signed and it cannot be verified. It reproduces the actual report format.

|                                     |                                                      |
|-------------------------------------|------------------------------------------------------|
| Certification identifier            | CERT-2026-0000000                                    |
| Date and time of issue              | 15-09-2026 08:30:12 UTC                              |
| Event channel                       | “Despliegues a producción” (ch_ejemplo0demo00000000) |
| Certified range                     | Sequence numbers 17,950 to 18,204                    |
| Events included                     | 255                                                  |
| Configuration versions in the range | v1, v2                                               |

## 1. What Safe Creative certifies

**SAFE CREATIVE STATES**

- Each of the 255 declarations in the range was received by Safe Creative on the date and time recorded for it in the evidence archive, and its content has not been altered since reception.
- The sequence of the range is intact and complete: the numbering has no gaps or duplicates and the cryptographic chaining of the declarations has been verified end to end, so no declaration has been inserted, replaced or removed afterwards.
- All events in the range are covered by qualified timestamps (231 sealed segments signed by Firmaprofesional, S.A.); each event is proven by its inclusion in the sealed segment of its channel.
- The channel configuration was sealed and its versions are kept without rewriting; this report reflects the version in force for each part of the range.

**THE CHANNEL OWNER DECLARES**

The meaning of the declared data, the designation of the declarant (section 3) and the supplementary information of the channel are statements of the channel owner, recorded as entered in the sealed configuration. Safe Creative certifies that those statements were made and when they were sealed, not their truthfulness. Safe Creative does not certify the truth of the facts declared in the events: it certifies their timed and intact reception.

## 2. Independent verification of this report

Verification code

**SC - 2026 - EJEM - PL00**

Anyone can check the authenticity and integrity of this report —without being a customer and free of charge— at [platform.safecreative.org/verify](https://platform.safecreative.org/verify): by entering the code (or following the QR) to compare its data, or by uploading the file to also confirm it has not been altered.

This report is issued in Spanish and in English, as two separately signed documents with the same verification code and the same evidence archive. Both versions are equally authentic and each can be verified on its own.

### 3. The channel and its sealed configuration

The channel configuration is a commitment declared before the facts: it was sealed when the channel was created and every later change produced a new sealed version, without rewriting the previous ones.

| Version | Recorded / sealed          | Modality  | Declarant                                     | Configuration digest                                             |
|---------|----------------------------|-----------|-----------------------------------------------|------------------------------------------------------------------|
| v1      | 03-06-2026<br>10:14:52 UTC | Hash only | Empresa Ejemplo, S.L.                         | 4049b0e2c0804ed1e9f71082306c63834eaab4363e7f70da628b250a7667eac6 |
| v2      | 08-09-2026<br>07:55:03 UTC | Hash only | Empresa Ejemplo, S.L. · Dirección de Sistemas | d26df3275da0dcd681015c8f0acee2c796121d642e83d295bf45004f071ddd87 |

|                                             |                                                                                                                                                                                                                                                                      |
|---------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Channel name                                | Despliegues a producción                                                                                                                                                                                                                                             |
| Declarant / requester of the certifications | Empresa Ejemplo, S.L. · Dirección de Sistemas<br><b>Designation entered by the channel owner in the sealed configuration and presented in this report as their statement; Safe Creative certifies that the designation was made and when, it does not verify it.</b> |

### 4. Technical summary of the certified sequence

|                                           |                                                                                                                             |
|-------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| Sequence numbering                        | 17,950 to 18,204, strictly increasing, with no gaps or duplicates (assigned by Safe Creative on receiving each declaration) |
| Digest algorithm                          | SHA-256                                                                                                                     |
| Chained digest before the range (anchor)  | 2ea9c0a5b845331866d33a8002888c29bc92150d085a3c1b3bd6b731927a5b98                                                            |
| Chained digest — first event (no. 17,950) | 63420beaaf3ea9ee7e9bf62347727665287be947fda7ee7acaa5be7cdad45d0a                                                            |
| Chained digest — last event (no. 18,204)  | ea8dc754d7c6877cec92e5c3d12a759986456dccf3a08a592449d6b0066ef492                                                            |
| Chain verification                        | Recomputed end to end over the 255 declarations: correct.                                                                   |
| Timestamp coverage                        | 255 of 255 events (100 %) · 231 sealed segments · qualified timestamp by Firmaprofesional, S.A.                             |
| First reception in the range              | 01-09-2026 06:02:11 UTC                                                                                                     |
| Last reception in the range               | 14-09-2026 09:41:07 UTC                                                                                                     |

The date declared by the emitter for each fact ("occurred\_at"), when present, is part of the customer's declaration and is included as such in the evidence archive; the date Safe Creative attests is the reception date of each declaration.

### 5. The evidence archive accompanying this report

The evidence archive contains the complete list of declarations with their digest, chained digest and sealed segment, the timestamps, the configuration versions and a manifest. Its SHA-256 digest, stated here, binds it cryptographically to this signed report.

|                  |                                                                                                       |

## 6. Liability framework

**Scope.** This report attests the dated and intact reception of the declarations in the range and the integrity of their sequence, as set out in section 1. It does not attest the truthfulness, accuracy or lawfulness of what was declared, nor the designation of the declarant, which are statements of the channel owner.

**Timestamps.** Each declaration is covered by the qualified timestamp of the segment that includes it, issued by the qualified provider named in section 4 under Regulation (EU) No 910/2014. The date and time of reception are assigned by Safe Creative's system; the segment's timestamp follows reception.

**Verification.** The authenticity of this report can be checked on the public verification page given in it. The evidence archive allows the digests, the chain and the timestamps to be checked with open standards, without Safe Creative's involvement.

**Retention.** Safe Creative retains the proof elements of the range and this certification for the period set out in the Safe Creative Platform terms of use.

**Evidential value and terms.** The assessment of this report is a matter for the authority or person before whom it is presented. It is issued under the Safe Creative Platform terms of use in force on the date of issue, governed by Spanish law. The Spanish and English versions are equally authentic and contain the same data; in case of any difference in wording, the data in the evidence archive prevail.

## 7. Signature

**Safe Creative** · 15-09-2026 08:30:12 UTC

In an actual certification, the report is electronically signed by Safe Creative on the date of issue. The signature protects the integrity of the whole document: any change invalidates it. **This sample is not signed.**
